Quality Assurance:

Our company strictly controls the quality of the mass goods by knitting, dyeing procedures for guarantying the fabric quality of good sense of touch and meantime meet the azo free, formalin free green products standard. When the approval of product size samples, style samples, color dips and other details from the buyers has been got then we proceed for bulk production.

Our quality assurance team will start inspection from knitting, dyeing, checking the paper pattern before cutting, during making & packing, metal detection and shipping marks etc. Meanwhile we strictly control the snap and other accessories quality to guarantee the goods that is harmless to the consumers. Products will be passed through metal detector before packing into cartoons. We have the similar QC service that takes place before the bulk fabric is cut. It consists of the elements listed below

Reporting of fabric & accessories arrival status

Visual control of fabrics: weight/m², color, hand feel.

Forecast of production timing (starting date, assigned capacity, daily output and finish date)

Checking with production supervisors whether they think the style is feasible in conformity with the approved samples. For each issue raised: making a test in the workshop and the reporting the exact results

Checking all the issues listed by the client and reporting results

DEPARTMENT WISE WORKING PROCEDURE:

In order to ensure smooth execution of all our valued orders we have dedicated individual team of highly skilled/experienced professionals in all departments who all as individual team under direct supervision of the top management.

Merchandising: We have our individual merchandising team based on specific products. Each team has a leader headed by a manager along with him senior merchandisers/merchandisers make one team. They are the functional merchandisers backed by technical manager equipped with CAD support and in-house sampling section.

In-House Q.C: Each merchandising team has dedicated team of in-house Q.C to support functional merchandising team during the sampling stage. Practically they provide all sorts of technical support/guidance/trouble-shooting to the concerned factory before starting bulk production since they are involved from development stage of an order. This team is also assigned to check and endure about required quality parameters of all the fabrics those are ready for bulk production. As we have a lab in our office to conduct the basic test which gives us additional support to control the quality parameter of the bulk production. Besides this we also do required tests b international reputed testing companies.

Production and Quality Assurance: Our Quality Assurance Managers of each division are assigned to conduct the quality audit and supervise day to day production activities. These Managers are well experienced from diversified background of the textile trade like Knits, Woven and Sweater. Pre-Final and Final inspection are the key responsibilities of Q.A starting from Cutting-Sewing-Packing including daily Audit and in line inspection on regular basis.

We also have individual audit team who are doing audits without announcement in running production randomly and frequently.

Pre-Final inspection is done on AQL 2.5 & 4 (Level 1) by our pre-final inspection team. If pre-final inspection passes then the final inspection will be done as per buyers' requirements buy our final inspection team.

Fabric QC: Those are specialized in Fabric manufacturing process only. We have separate teams for **Knits, Woven, Sweater**- all allocated for all the factories to monitor the production process from the grass root level like Yarn Count, Machine Gauge/Diameter, Knitting/Weaving technique, Dyeing/ Finishing process and conduct final inspection before sending them to the Garment Sewing Floor

Test QCs: Those are assigned to look after the washing (wet & dry) process of the orders having such requirement. They are also highly experienced and well conversant about the modern techniques of all types of washing process of today's textile market.

LAB TEST: Colorfastness, Pilling, Fiber composition, Shrink GSM etc. are done from "SGS, ITS, STR - Bangladesh" as per L/C / Buyer requirement

Commercial & Logistics: Our expert team leads the whole commercial activities/ banking/ customs/ export documentation/ tie up with shipping lines locally and then communicates with the buyers' concern department to ensure timely arrival and delivery of each consignment to the destination port/warehouse.

Lead Time: Normal Lead Time 45- 65 days (Local knit Fabrics) 70- 100 days (Imported Woven & Knit Fabrics)

Mode of Payment: We accept Irrevocable & transferrable LC

As a matter of business policy we maintain very strong ethics in the best transparent manner. We also believe in long term relationship based on mutual trust and understanding. We never neglect our professional responsibilities and run away to participate in any amicable settlement towards any trade disputes which may arise during the course of execution of business dealings. Once we are committed to perform, stand by on it and we do expect similar reciprocation from our associates since we treat our buyers and factories as partners in progress :
